

## **WENAAS SUPERLIGHT LOWSHOE**

**ART. NO: 0-72-840-10**

Superlight is a light and soft shoe. All materials are carefully selected to minimize the weight through all levels. With the textile panels you get a good ventilated shoe. Its ESD properties make it usable for users who require electrostatic discharge sensitive footwear.

Synthetics and durable textiles – Upper materials with low weight, textile with high ventilation for optimal comfort

Soft outsole – PU/PU outsole, with excellent shock absorption and high density, the soft outsoles allows the feet's to move naturally, increase contact surface.

Air mesh lining – 3 dimensional mesh increase the breathability and the airflow for better ventilation.

Composite Toe cap – Lightweight, return memory, non-thermal, non-magnetic maximum security at work and maximum comfort.

Proflex - Soft nail protection – Allows the foot to have a natural flex and movement, 100% protection, covers the whole foot.

Superlight is especially suitable for users within light industry, transport and warehousing.
